DETAILED ACTION

Allowable Subject Matter

Claims 1, 4, 6, 7, 10, 12-18, and 20-27 are allowed in view of the prior art.

The following is an examiner's statement of reasons for allowance:

As to claims 1, 7, and 17, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a method and system for monitoring a laser signal, this method and system comprising an etalon that receives a laser signal, a first detector that detects light transmitted by the etalon producing a transmitted signal, a second detector that detects light reflected by the etalon producing a reflected signal, and a monitor that sharpens the peaks of the transmitted signal by dividing the transmitted signal by the reflected signal, in combination with the rest of the limitations of the above claims. For further reasoning, please see the applicant's arguments dated February 10, 2006.

As to claims 21 and 23, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a method and system for monitoring a laser signal, this method and system comprising the production of a transmitted signal of light passing through an etalon by a first detector, the production of a reflected signal of light reflecting off of the etalon by a second detector, and a monitor generating a sinusoidal signal for use in interpolation, the signal being generated by dividing the reflected signal by the transmitted signal, in combination with the rest of the limitations of the above claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
